

Bolus

A-Milk Vet

Vitamin, Mineral, Amino acid, Herbal extract

Only for the use of animals

Composition

Each bolus contains Jivanti (*Leptadenia reticulata*) 100 mg, Teuri (*Operculina turpethum*) 500 mg, Satamuli (*Asparagus racemosus*) 500 mg, Aswagondha (*Withania somnifera*) 300 mg, Bhumikusmandu (*Ipomea paniculata*) 300 mg, Shunthi/Ada (*Zingiber officinale*) 100 mg, Niacin 1000 mg, DL-Methionine 100 mg, Ferrous Sulphate 20 mg, Dicalcium phosphate 200 mg.

Pharmacology

A-Milk Vet is a combination of both herbal and chemicals intended for use to increase milk quality and quantity.

Jivanti: Jivanti is considered as stimulant and tonic. It is helpful for maintaining vigour & strength and propagator of milk.

Teuri: Teuri is a safe & effective medicinal plant. It possesses ulcer protective & hepatoprotective properties. It improves GI disorders & liver function.

Satamuli: Satamuli maintains milk secretion by inhibiting involution of mammary tissue. It also functions as a reproductive system tonic, immunomodulator, anti-oxidant and anti-stress.

Aswagondha: It stimulates milk production, eases stress and rebuilds physical strength & vitality.

Bhumikusmandu: It stimulates digestive system, induce lactation and increase metabolic rates.

Shunthi/Ada: It is a digestive stimulant. It keeps the intestine healthy, eases the transport of nutrients & helps to letdown of milk.

Calcium: Calcium is an important element of bone & teeth formation and for milk production. It is also essential for nerve function, cardiac & other muscular activity and blood clotting.

Niacin: Niacin is a component of two important co-enzymes, Nicotinamide Adenine Dinucleotide (NAD) and Nicotinamide Adenine Dinucleotide phosphate (NADP), which are essential for metabolism for energy generation. It plays a vital role to stimulate microbial protein synthesis, fat metabolism & to increase milk yield. Niacin is used to prevent ketosis.

DL-Methionine: It is an essential amino acid intended to use to increase milk protein & milk fat content. It is also used as a urine acidifier.

Iron: Iron is a component of haemoglobin. It is also an important component of cofactors of many enzymes of electron transport chain.

Indications

A-Milk Vet is indicated

- ▶ to increase milk yield & to maintain persistent milk yield
- ▶ to increase fat content & solid not fat (SNF)
- ▶ for easy let down of milk
- ▶ for regulating heat periods & pronouncement of heat symptoms
- ▶ for reducing inter - calving periods
- ▶ to avoid abortion during pregnancy
- ▶ for healthy growth of calf
- ▶ to improve hoof condition

Dosage and administration

Route of administration: Oral

Cattle and Buffalo: 2-4 boli orally daily.

Or as directed by the registered Veterinary Physician.

Contraindication

It is contraindicated in animals hypersensitive to it.

Warning & precaution

Not known

Side effects

Common: Not known

Rare: Not known

Use in pregnancy & lactation

Not known.

Drug interaction

With medicine: Not known.

With food & others: Not known.

Overdose

Usually safe at recommended dose. However, risk & necessity should considered before administration.

Withdrawal time

Meat & Milk- 0 (Zero) day.

Storage

Store below 30° C temperature and dry place, protected from light.

Keep out of reach of children.

Packing

10x2's boli in a box.

Manufactured by

The **ACME** Laboratories Ltd.

Veterinary Division

Dhulivita, Dhamrai, Dhaka, Bangladesh
