Basaka

Composition

Each 5 ml HONEYBAS™ syrup contains extract of *Adhatoda vasica* 2.50 ml & other ingredients with excipients as required.

Ref.: B.N.A.F-2011

Description

Adhatoda vasica (family Acanthaceae) commonly known as Basaka. It is a well-known herb in indigenous systems of medicine for its beneficial effects. Basaka has shown antitussive, cough expectorant, antioxidant and antimicrobial activity.

Pharmacology

Extracts of Basaka contains alkaloids, tannins, flavonoids, terpenes, sugars, and glucosides. The principle constituents of Basaka are its several alkaloids, the chief one being vasicine. The leaves contain two major alkaloids called vasicine and vasicinone. Vasicine and vasicinone showed bronchodilatory activity and relaxation of the tracheal muscle. Extract of Basaka has significant amounts of antioxidant and antimicrobial agents. Basaka shown broad spectrum of antibacterial activities.
