

MB 12[®]

Tablet

Mecobalamin

COMPOSITION

MB 12[®] Tablet : Each film-coated tablet contains Mecobalamin INN 0.5 mg.

PHARMACOLOGY

Mecobalamin is an endogenous coenzyme-type vitamin B₁₂. This active ingredient is transported to nerve tissues better than any other types of vitamin B₁₂ and promotes nucleic acid, protein and lipid metabolism through transmethylation reactions. MB 12[®] acts to repair damaged nerve tissue in nerve disorders such as axonal degeneration and demyelination. It also promotes the maturation and division of erythroblast and heme synthesis.

INDICATIONS

MB 12[®] is indicated for the treatment of :

- Peripheral neuropathies (for example, diabetic and alcoholic neuropathy, drug induced neuropathy, lumbago, entrapment neuropathy, intercostal neuralgia and diabetic retinopathy and other neuropathies).
- Megaloblastic anemia due to vitamin B₁₂ deficiency (injection only).

DOSAGE & ADMINISTRATION

Route of administration:

MB 12[®] Tablet:

The usual dose for adults is 1 Tablet (0.5 mg of Mecobalamin), administered orally three times a day.

The dose should be adjusted according to the age of patient and severity of symptoms.

OR AS DIRECTED BY THE PHYSICIAN

CONTRAINDICATIONS

Hypersensitivity to any component of this product.

PRECAUTIONS

MB 12[®] should not be used over a period of months, if there is lack of satisfactory clinical response. MB 12[®] is susceptible to photolysis. It must be used promptly after the package is opened, and care must be taken not to expose the ampoules to direct light.

SIDE EFFECTS

Loss of appetite, nausea, diarrhea or other symptoms of gastrointestinal upsets may infrequently appear.

USE IN PREGNANCY & LACTATION

Not recommended during pregnancy & lactation.

USE IN CHILDREN & ADOLESCENTS

Not recommended for children.
