

Oral Emulsion
MAGVET PLUS
Magnesium Hydroxide BP & Liquid Paraffin BP

Only for the use of animals

Composition

Each 5ml contains Magnesium Hydroxide BP 300 mg & Liquid Paraffin BP 1.25 ml.

Pharmacology

The osmotic force of Magnesium Hydroxide acts to draw fluids from the body and to retain those already within the lumen of the intestine, serving to distend the bowel, thus stimulating nerves within the colon wall, inducing peristalsis and resulting in evacuation of colonic contents. Magnesium Hydroxide acts as alkali to neutralize acid. Liquid paraffin acts as a stool lubricant.

Indication

Indicated for the treatment of constipation, bloat, acidosis, simple indigestion, impaction & abomasal ulceration.

Dosage & administration

Route of administration: oral

Large Animal

Upto 0-1 year: 100-200 ml.

Upto 1-2 years: 200-300 ml.

Over 2 years: 300-500 ml.

250 ml water to be added to the emulsion and shake well before administration.

Or, as directed by the Veterinary Physician.

Contraindication

Contraindicated in animal with dehydration and renal failure.

Warning & precaution

Some products have significant quantities of sodium and potassium and should be used cautiously in patients who should have these electrolytes in their diet.
