

NEOBET

(Neomycin Sulfate + Betamethasone Valerate)

Cream

DESCRIPTION

Betamethasone is an active topical corticosteroid, which produces a rapid response in the inflammatory dermatoses and cures psoriasis types of skin diseases. Neomycin Sulfate is a topical broad-spectrum bactericidal amino-glycoside effective against various kinds of gram-positive and gram-negative pathogens such as *Proteus vulgaris*, *Staphylococcus aureus* etc. NEOBET has effective penetration and uniform distribution capacity, so it is very effective in hairy and intertriginous places. NEOBET cream is very effective for the treatment of wet ulceration of the skin.

COMPOSITION

Each gram cream contains Neomycin Sulfate USP 5.0 mg and Betamethasone (as Valerate) USP 1.0 mg.

INDICATIONS

NEOBET cream is usually useful for the treatment of superficial infections caused by gram-positive and gram-negative microorganisms. It is also useful in burns, regeneration of new skin in wounds and ulceration, otitis externa, postoperative infections, neuro-dermatitis and eczema. It may be used as an adjunct to systemic steroid therapy in special kind of pyoderma.

DOSAGE AND ADMINISTRATION

NEOBET cream should be applied to the affected parts of the skin as thin layer for 3 to 4 times daily. In chronic condition, withdrawal of treatment is carried out by decreasing the frequency of application until the cream is applied as infrequently as once a week.

SIDE EFFECTS

NEOBET cream is well tolerated. But prolonged and high doses may cause Cushing's syndrome, acne, thinning and dilatation of blood vessels, particularly when occlusive dressings are used.

CONTRAINDICATIONS

NEOBET cream is contraindicated to the patients who are hypersensitive to any of its components. It should not be used for the treatment of otitis externa when the eardrum is perforated. It is contraindicated in skin lesions caused by infection with viruses and fungi.

PRECAUTIONS

Long term continuous topical therapy of NEOBET should be avoided, which may produce many resistant micro-organisms. So, accurate dose of NEOBET should be used in infected areas only.
