

Ezygut

Probiotic Combination 20 Billion

Composition

Each capsule contains combination of 20 billion organisms of *Bifidobacterium lactis* BI-04, *Bifidobacterium lactis* BI-07, *Lactobacillus acidophilus* NCFM and *Lactobacillus paracasei* Lpc-37.

Pharmacology

Ezygut is a unique freeze-dried probiotic blend of *Bifidobacterium lactis* BI-04, *Bifidobacterium lactis* BI-07, *Lactobacillus acidophilus* NCFM and *Lactobacillus paracasei* Lpc-37 that provides support to individuals who have high demands on their digestive tract or their immune system due to diarrhea, antibiotic use and stress. Extensive in vitro and in vivo studies support the health benefit of these strains. Has high tolerance to gastrointestinal conditions and strong adhesion to intestinal cell-lines. It has been found to restore and maintain microbiota after

Capsule

antibiotic use. Moreover, it also improves specific immune responses.

Indications

Ezygut is used to support digestive health in patients suffering from diarrhea. The drug restores gut flora and overcome gut discomfort in individuals on an antibiotic regimen. It also improves IBS (Irritable Bowel Syndrome) related abdominal pain and bloating.

Dosage & Administration

Route of administration: Orally.

1 capsule daily with a meal or as recommended by the physician. In diarrhea and after antibiotic course the duration of the treatment should be 2-4 weeks and in IBS the duration should be 4-12 weeks. In children unable to swallow the capsule the content of the capsule can be mixed in a glass with water, juice or nor milk to drink.

Or as directed by the physician.
