Vitamin B ₁₂	250 mcg	Zinc Sulphate	1000 mg
Nicotinamide	2500 mg	DL-Methionine	1000 mg
Calcium-D Pantothenate	2500 mg	L-Lysine	2000 mg
Vitamin C	5000 mg		

Pharmacology

These nutrients work synergistically to maintain the health and productivity of animal, especially during periods of stress, such as environmental changes, disease challenges, or handling. During stress, the demand for certain vitamins increases, as they help mitigate the effects of oxidative stress, enhance immune response, and support recovery. Minerals are important in maintaining metabolic stability and supporting the immune system during stress. During periods of stress, the demand for certain amino acids, such as methionine and lysine increases. These amino acids help in maintaining muscle mass, boosting immune function, and reducing the negative effects of stress by supporting the synthesis of stress-related hormones and proteins.

Indications

AviMax™ Vet powder

- Helps to overcome any kind of stress
- Increases growth rate
- Improves immune function of poultry & large animal

It is also indicated for increased requirements of vitamins & minerals due to poor feeding, improper feed, and lower feed intake & decreased absorption, acute and chronic diseases, infections, during treatment with antibiotics / anthelmintic etc.

Dosage & administration

Poultry: 1 g / 5 litre of drinking water or, 20-40 g / 100 kg feed for 4-5 days.

Cow & Buffalo: 0.5-1 g / day for 4-5 days.

Sheep & Goat: 0.5 g / day for 4-5 days.

Or, as directed by registered Veterinarian.

Contra-indication

Contraindicated in animals hypersensitive to active ingredient.

Warning & Precaution

Please close the packet after use.

Side effects- Common: Not known. **Rare:** Not known.

Use in Pregnant & Lactating Animal and Laying Bird

The safety of this product has not been evaluated in the target species during pregnancy & lactation. But this drug does not cause any particular problem during use in pregnancy & lactation. However, risk & necessity should be considered during administration in pregnant & lactating animal.

Drug interaction

With medicine: Not known. **With food & others:** Not known.

Overdose: Not known.

Withdrawal time: Meat, Egg & Milk- 0 (Zero) day.

Storage: Store below 30°C temperature and dry place, protected from light.

Keep out of reach of children.

Packing: 100 g sachet.
